

## Positioning elements (page layout)

The goal of this exercise is to learn the layout of a webpage. The look of the webpage is shown below. Write a CSS file called `style.css` and place it in the `css` folder for testing. You will only submit the `css` (`style.css`) file for this project.

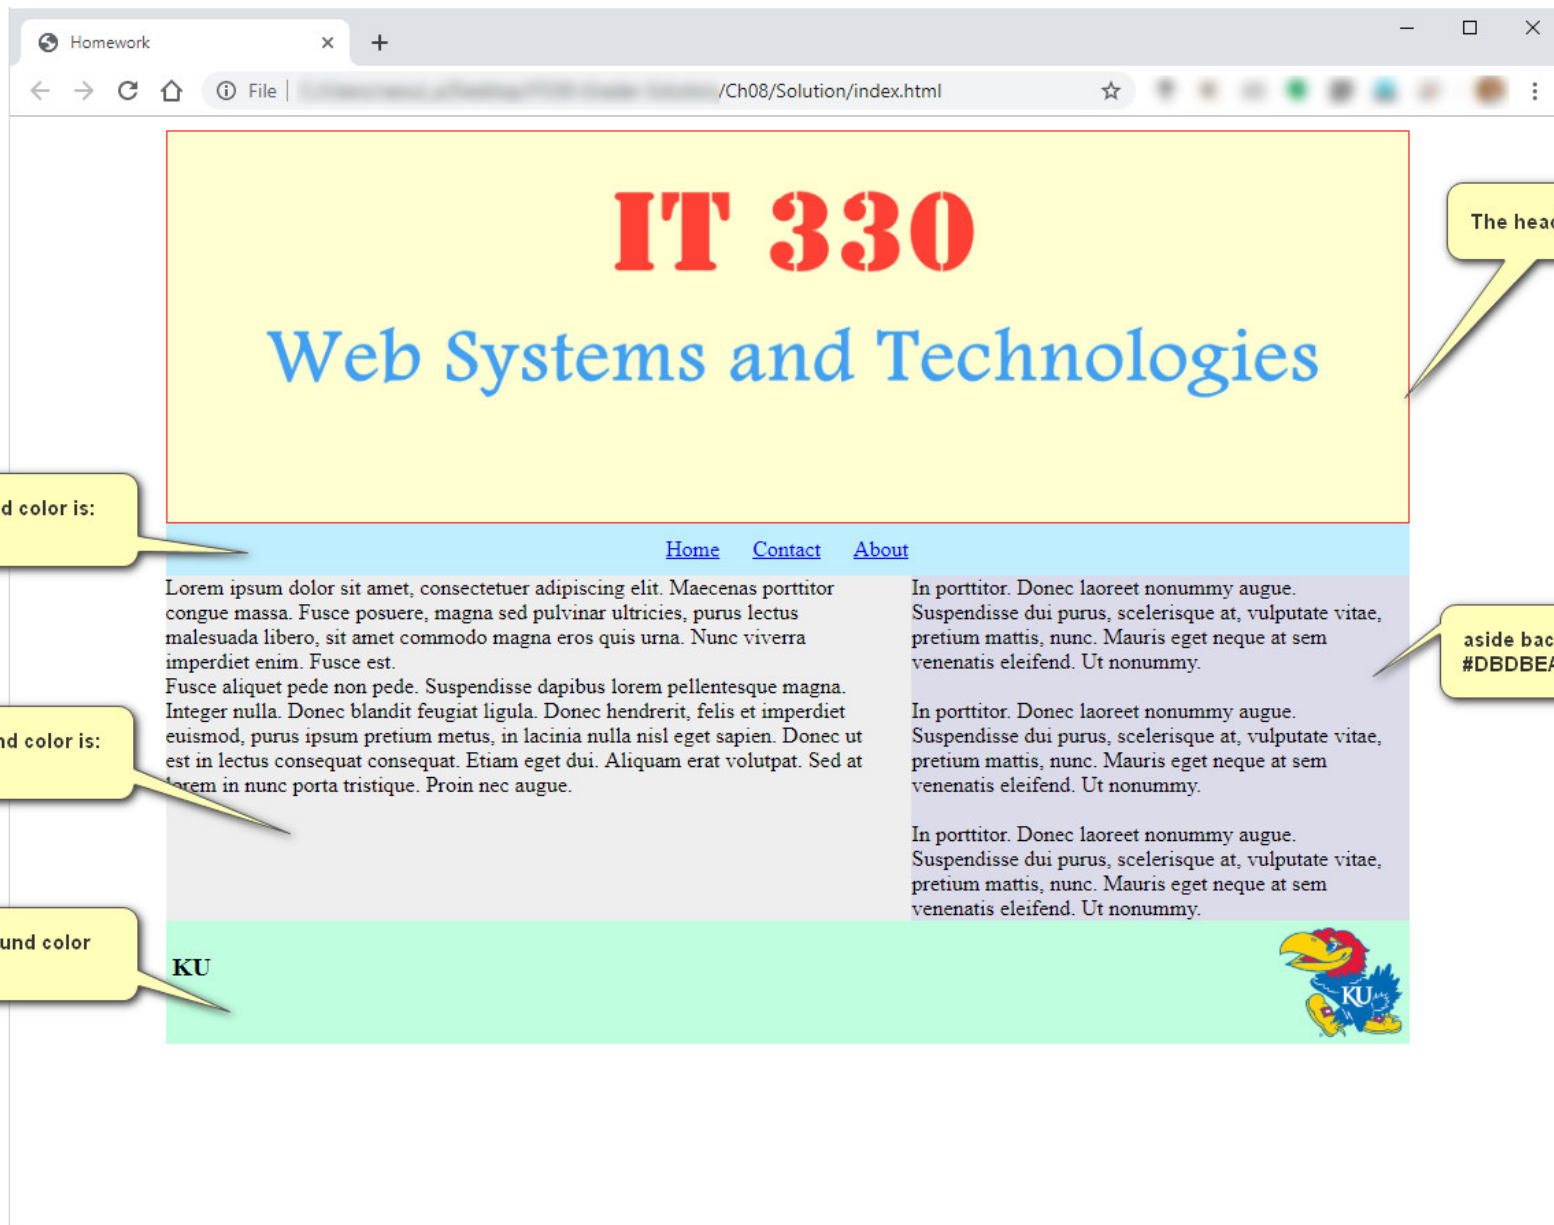

The HTML file is provided. Do not modify the HTML file and the dimensions of the images (don't resize images).

The dimension of the *container*, *main*, and *aside* elements are:

- The *container* width is 80% of viewport but not more than 960 pixels or less 500 pixels (`max-width: 960px; min-width: 500px; width: 80%;`).
- The *main* and *aside* elements widths are 60% and 40% respectively.
- The Jayhawk logo (lower right corner) width should be 10%.
- The colors are included in the snapshot.

This page is liquid, meaning, as the browser's width is expanded or contracted the page behaves accordingly.

Should you have any questions, please contact me by email or stop by my office.
